Objective

To secure a challenging role as a Software Engineer or Data Scientist in a reputed organization where I can effectively utilize my skills in data science, programming, and cloud computing, contribute to impactful and innovative projects, continuously enhance my technical and problem-solving abilities, and add value to the organization's growth while advancing my professional career.

Education

Lovely Professional University **Jalandhar, Punjab**
Bachelor of Technology in Computer Science and Engineering, CGPA: 7.21 *2023*
Relevant Coursework: Data Structures and Algorithms, Operating Systems, Database Management Systems, Artificial Intelligence, Computer Networks, Software Engineering

Kendriya Vidyalaya, Sec-5 **New Delhi, Delhi**
Senior Secondary School Certificate (12th Grade), Percentage: 68% *2023*
Key Subjects: Physics, Chemistry, Mathematics, Computer Science

Kendriya Vidyalaya, Sec-5 **New Delhi, Delhi**
Secondary School Certificate (10th Grade), Percentage: 88% *2021*
Achievements: Strong performance in Mathematics and Science subjects.

Technical Skills

Programming Languages: C++, Python, C, Java, SQL

Tools/Technologies: Power BI, GitHub, AWS, Cisco Packet Tracker

Operating Systems: Linux, Windows

Databases: MySQL, MongoDB

Frameworks: HTML and CSS, Scikit-learn, TensorFlow, Flask

Projects

Project Title: *AirVista – Travel Website Deployment*
Description: A travel website deployed on AWS cloud to host static web pages and provide online access to travel-related information.
Technologies Used: Python, RandomForest Regressor, Flask, HTML, CSS.
Impact/Achievements: Predicts flight ticket prices with 83.27% accuracy through a simple and responsive web interface.
Demo/Code Link: https://github.com/atulkumar1016/Flight_prices_prediction.git

Project Title: *Indian General Election Analysis Dashboard*
Description: An interactive dashboard visualizing Indian general election results with party-wise, state-wise, and phase-wise analysis.
Technologies Used: Power BI, DAX, Data Visualization, Data Modeling.
Impact/Achievements: Provides insights into party performance, seat trends, and vote distribution through dynamic visuals and slicers.
Demo/Code Link: https://github.com/atulkumar1016/Election-Analytics-India-General-Elections-2024-.git

Certifications

- **Data Visualization Virtual Internship** | Forage (Completed in Sept 2025)
- **Object-Oriented Programming Certification** | iamneo (Completed in Dec 2024)
- **Responsive Web Design Certification** | freeCodeCamp (Completed in Oct 2023)
- **AWS Cloud Practitioner Certification** | Amazon Web Services (Completed in 2025)

Achievements

- **Hackathon Finalist:** Secured Top 5 position in Hack-IoT Hackathon at Lovely Professional University (2023).
- **DSA Problem Solving**: Solved 150+ Data Structures and Algorithms problems on LeetCode.

AI Recommendations for Improvement

Recommendation 1: Deploy projects on AWS and include live demo links.

Recommendation 2: Practice DSA regularly to improve problem-solving skills.

Recommendation 3: Build end-to-end data science projects using real-world datasets.

Self-Assigned Tasks (Till 10th week of this semester)

Task 1: Solve 200+ DSA problems focusing on arrays, linked lists, and trees.

Task 2: Deploy one machine learning project using Flask and AWS.

Task 3: Build a Power BI dashboard with real-world dataset and interactive visuals.

Targets Allocated

Targets Approved by Course Instructor

- Complete certification in [Certification Name].
- Enroll in and complete [Specific MOOC or course].
- Finish the project titled "[Project Name]" to strengthen your CV.
